

For Immediate Release

**DAHLE NORTH AMERICA'S NEW DISINTEGRATOR:**

Confidential material can be found on more than just paper

Peterborough, NH, May 6, 2005 – With the rapid growth in Identity Theft and Consumer Fraud, it's important to have a shredder that destroys more than just paper. Dahle North America's new XC-100 Disintegrator is a paper shredder and disintegrator in one self contained unit. This machine will allow the user to shred paper, CD's, DVD's, audio and video cassettes, I.D. badges, floppy disks and much more!

“Sensitive data comes in many shapes and sizes.” said Scott Prokop, VP and General Manager, Dahle North America, Inc. “It only makes sense to have one machine that can destroy them all.”

Dahle North America's new Disintegrator features a state of the art control panel for easy operation and a safety key to prevent unauthorized use. Run by a powerful 3 Hp

motor, the XC-100 will take confidential material and pulverize it to a 1.5mm x 2.5mm particle size. This machine will easily fit through any standard doorway and the swivel casters make it easy to move into place. It's also quiet enough not to disrupt a normal office environment. The XC-100 been evaluated by the NSA and meets the requirements of NSA/CSS Specification 02-02 for High Security Disintegrators.

Dahle North America, Inc. is a fully integrated manufacturer and distributor of business machines and office products with a brand name recognized for quality and precision.
