**DAHLE NORTH AMERICA OFFERS SCISSORS YOUR
GRANDMOTHER WOULD APPROVE OF**

Peterborough, NH, April 2, 2003 - Ever wonder why your grandmothers old pair of scissors are still your favorite? It's because they were built to last with the finest materials available. Dahle uses that same formula in the design of their Super Shears. These professional grade scissors can handle the toughest material as well as the most delicate fabric. Dahle Super Shears are German made with Solingen Steel cutting blades that cut all the way to the tip for fine trimming.

"Dahle Super Shears are the LAST pair of scissors you will ever need to buy," said Chuck Cannon, National Sales Manager, Dahle North America, Inc. "We are so sure you'll never need another pair of scissors that we guarantee them for life."

Our Super Shears feature machine ground blades that are hand finished and hardened for precision cutting. The handles are made of a tough ABS plastic that is virtually unbreakable. Dahle Super Shears are affordably priced and are available in 4" - 10" sizes making them a must have tool that even grandma would approve of.

Dahle North America, Inc. is a fully integrated manufacturer and distributor of art and craft tools, business machines and office products with a brand name recognized for quality and precision. Dahle markets more than 300 products, including paper cutters and trimmers, cutting mats and scissors, and pencil sharpeners, for the home, office, and art markets.
